

FLD1500

Floor Level Palletizer

This latest design is part of a new family of palletizers from Columbia Machine that are all capable of being equipped with a fully integrated stretch wrapper that allows for concurrent “stack and wrap” load building. The FLD1500 utilizes a dual hoist concept, room for storing two rows plus one full layer of product and an electric row pusher. This allows for a very compact footprint where the main frame is only 90 square feet!
