Columbia Machine Unveils FLD1500-SW: A Compact, High-Efficiency Palletizer with Integrated “Stack and Wrap” Technology

Vancouver, WA, September 29, 2025: Columbia Machine, a leading innovator in palletizing solutions, proudly announces the launch of the FLD1500-SW, the latest model in its new family of advanced palletizers. Designed for performance and space efficiency, the FLD1500-SW features a fully integrated stretch wrapper that enables simultaneous “stack and wrap” load building.

At the heart of the FLD1500-SW is a servo controlled dual hoist design, which, combined with an electric row pusher and storage capacity for two rows plus one full layer of product, delivers seamless and efficient operation. All of this functionality is housed within a remarkably compact 90-square-foot main frame, making it an ideal solution for facilities where space is at a premium.

“This new design reflects Columbia Machine’s continued commitment to innovation and customer-focused engineering,” said Mark MacDonald, President – Palletizer Division at Columbia Machine. “The FLD1500-SW not only maximizes efficiency with its integrated stretch wrapper, but it also addresses the real-world challenges of floor space and operational speed.”

The FLD1500-SW is part of a broader family of palletizers that can be equipped with Columbia’s integrated stretch wrapping technology, setting a new standard for compact, high-performance palletizing systems. For more information, visit www.columbiemachine.com.

ABOUT COLUMBIA

Established in 1937, Columbia Machine is a fourth generation, privately held, worldwide leader in the design, manufacturing, and support of factory automation equipment solutions for a variety of industries, with customers in over 100 countries around the world. Primary business units include Batching and Mixing Solutions, Concrete Products Equipment Solutions, Production Equipment Molds, Bag Filling and Handling Technology, Mechanical Palletizing Machines, Robotic Palletizing Solutions, Conveyor System Solutions, Pallet Load Transfer Solutions, and Manufacturing Services. The Columbia Group of Companies has seven manufacturing facilities on four continents, with over 1,300 team members worldwide, focused on world-class engineered solutions and customer service.

Innovation Driven by Safety, Flexibility and Performance.
