Columbia Machine Unveils Ultra-Fast HL9200 BevMax High Level Palletizer

Vancouver, WA, January 12, 2026: Columbia Machine, a leading innovator in palletizing solutions, proudly announces the launch of the HL9200 BevMax Palletizer.

The HL9200 BevMax is engineered specifically for high-speed beverage applications, delivering exceptional throughput, flexibility, and intelligent automation for demanding production environments. The HL9200 BevMax features high-speed product infeed, advanced layer pattern creation, servo-controlled variable position turners, and segmented layer stops for precise control at maximum speeds. Dual-path servo controlled layer pushing technology, high-speed stripper apron plates, and a servo-controlled full-load hoist maximize cycle rates while maintaining accuracy and load integrity.

The intuitive Product Manager HMI allows operators to quickly create or modify pallet patterns, automatically adjusting the programmable laner and smart squeeze technology to ensure gentle handling and consistently stable pallet loads. Designed to keep pace with high-speed beverage lines, Fully Category 3 safety compliant, the HL9200 delivers high-speed beverage performance without compromise.

ABOUT COLUMBIA

Established in 1937, Columbia Machine is a fourth generation, privately held, worldwide leader in the design, manufacturing, and support of factory automation equipment solutions for a variety of industries, with customers in over 100 countries around the world. Primary business units include: Batching and Mixing Solutions, Concrete Products Equipment Solutions, Production Equipment Molds, Bag Filling and Handling Technology, Packaging Solutions, Mechanical Palletizing Machines, Robotic Palletizing Solutions, Conveyor System Solutions, Pallet Load Transfer Solutions, and Manufacturing Services. The Columbia Group of Companies has manufacturing facilities on five continents, with over 1,200 team members worldwide, focused on world-class engineered solutions and customer service.
